

Occupational Health Surveillance Screen

"The Corporate Manslaughter & Corporate Homicide Act is adding even more responsibility to Directors & Management. Prevent plc's Occupational Health Surveillance Screen will help companies even with a reduced budget protect themselves & most importantly their employees."

Geof Humphrey MBA.DMS.RN.FCMI., Nexus Occupational Health Services

What does Occupational Health Surveillance Screen cover?

Prevent plc's Occ Health Surveillance Screen very simply covers the following key issues;

- Eyesight to Occupational Health Standard plus colour blindness
- Hearing Test using the very latest mobile Siemens equipment
- Lung Function Test
- Skin Surveillance
- Hand Arm Vibration Syndrome Surveillance
- Musculo-skeletal Assessment
- Blood Pressure
- Urinalysis for Protein, Glucose and Blood
- Health and Safety Questionnaire that can be specific to your industry ie working at heights

Plus

- Report to employer advising whether individuals should have further testing and advising the employer of the risk area and action to take.
- Medical Certificate of Attendance for your organisation.

**£25 per Surveillance Screen
minimum price £500/day**

How is the Occupational Health Surveillance Screen delivered?

- The screens can be conducted at your workplace and at multiple sites. You just need to provide a small private room with a table & two chairs.
- The screens only last 20 minutes – reducing the amount of time your employees are away from production.
- We can provide advertising material and booking administration support at no extra cost.

Drugs & Alcohol Screening can be added if requested in advance

New! Paper based Occupational Health Surveillance Filter

Our Occ Health Surveillance Screen results confirmed that 95% of the employees who failed the 'face to face' screens would have also failed our paper based Occ Health Surveillance Filter. Therefore, where clients have hundreds of employees or employees who are scattered around the country and would find it difficult to arrange 'face to face' screening – the filter is perfect.

We have designed a questionnaire that is completed by the employee but transferred to an online reporting system that clearly shows the client where the potential issues are and what action needs to be taken.

Clients who have used the filter have saved themselves £000's in Occupational Health budget.
