

Occupational Health Surveillance Assessment

*A high quality, convenient and cost effective method of delivering **your** Health & Safety obligations to **your** employees.*

What does the Occupational Health Surveillance Assessment cover?

- Eyesight to Occupational Health Standard plus colour blindness test
- Hearing Test using the very latest mobile Siemens equipment
- Lung Function Test using a digital spirometer
- Skin Surveillance using a BIA Skin monitor
- Hand Arm Vibration Syndrome Surveillance
- Musculo-skeletal Assessment
- Blood Pressure
- Urinalysis for Protein, Glucose and Blood (optional)
- Fit to complete job role assessment eg BMI or Fitness Test where applicable.
- Occupational Health Questionnaire

£30 per assessment

**Subject to a minimum of
£600 per day**

How do the assessments work?

- The assessments will be conducted within a private room at your premises by an Occupational Health Practitioner.
- The assessment will last 20 minutes
- The employee will be advised of their results during the assessment and a report will be sent to the organisations H&S Manager within 14 days.

Why is the Occ Health Surveillance Assessment beneficial to you?

Results confirm that the vast majority of participants will have very positive screening assessments. In some cases, participants are advised of issues that need to be addressed but if corrected early, could improve future results.

Additionally, the assessment will allow participants to discuss with the practitioner any changes to the workplace that will help maintain good health or improve future health.

Note: The assessment can be amended to meet your specific requirements e.g. Forklift Driver Medicals or Working at Height Assessments
